Exam Format

The AP Computer Science A Exam is a 3-hour, 15-minute exam that consists of two sections:

- **Section I: Multiple Choice (50%)**
- **Section II: Free Response (50%)**

The multiple-choice section consists of 40 questions that cover a wide range of topics in computer science, including:

- Data structures (arrays, lists, stacks, queues)
- Algorithms (sorting, searching, recursion)
- Object-oriented programming (classes, objects, methods)
- Software design (UML diagrams, design patterns)
- Computer architecture (hardware, software, networks)

The free-response section consists of six questions that require you to solve coding problems using the Java programming language. These questions are more challenging than the multiple-choice questions and require you to demonstrate your understanding of programming concepts and your ability to apply them to solve real-world problems.

Content

The AP Computer Science A Exam covers a wide range of topics in computer science. The College Board, which administers the exam, has organized the content into seven units:

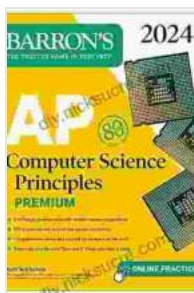

1. **Unit 1: Computational Thinking (15-20%)**
2. **Unit 2: Data Structures (20-30%)**
3. **Unit 3: Algorithms (20-30%)**
4. **Unit 4: Object-Oriented Programming (15-20%)**
5. **Unit 5: Software Design (10-15%)**
6. **Unit 6: Computer Architecture (10-15%)**
7. **Unit 7: Ethics and Social Implications of Computing (5-10%)**

A detailed description of each unit can be found on the College Board website.

Strategies for Success

Here are some strategies for success on the AP Computer Science A Exam:

- **Start studying early.** The AP Computer Science A Exam covers a lot of material, so it's important to start studying early and give yourself plenty of time to review.
